

OVERPACK

FLEXIBLE HIGH-SPEED BUNDLER FOR GROUPING ALL TYPES OF TISSUE PRODUCT

OVERPACK is the new bundler for grouping and wrapping toilet rolls and kitchen towel in heat-sealable polyethylene, designed both for consumer or AFH markets.

Its extreme flexibility allows it to operate with horizontal and vertical cores in multiple configurations, to satisfy all the market's needs.

OVERPACK MAIN FEATURES

Maximum speed: **22 bundles per minute.**

Time required for complete format change: **15-30 minutes** depending on configuration.

Reel change speed: **3-4 minutes.**

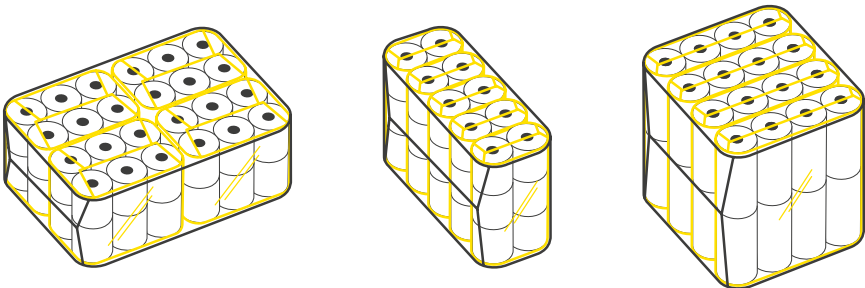

Capacity range

- Finished pack width: **from 300 to 1000 mm.**
- Finished pack length: **from 200 to 1200 mm.**
- Finished pack height: **from 180 to 500 mm** (100 mm is optional).

Polyethylene thickness: 35-70 microns.

OVERPACK allows significant saving of wrapping material with a consequent reduction in production costs and impact on the environment.

Thanks to the optimization of surplus material during sealing and cutting, only 33 mm wide, **OVERPACK** allows a reduction of plastic for each bag produced.
